

Our Mission:

To provide in-depth leadership training to low-income college-bound high-school students in order to better prepare them for the challenges ahead in college.

Our Program:

At the core of STEP's program is a profoundly empowering 3-week leadership expedition with the National Outdoor Leadership School (NOLS). To date, all of our STEP Expeditions have taken place in Alaska. STEP is partnering with NOLS because it is at the forefront of leadership training nationwide. A NOLS expedition is now part of every astronaut's training before they go into space. STEP's leadership expedition is specifically designed to increase students' self-confidence, enhance their ability to meet unfamiliar challenges, and widen their view of what's possible for the future.

STEP's full program includes three phases:

- 1) Pre-expedition Trainings and Orientations
- 2) STEP Leadership Expedition
- 3) Post-expedition Speakers Program & Activities

Student Qualifications:

- 1) Attending high school
- 2) Low household income (up to slightly above qualifying level for reduced school lunch program)
- 3) Grade point average of 3.0 and above
- 4) Strong desire to obtain a 4-year college degree
